S K Somaiya College

Certificate

This is to certify that the project report entitled _____ is
bonafide record of the project work done by _____
in the year 2024-25 under the guidance of _____ Department of Data
Science in partial fulfillment of requirement for the Bachelor of Data Science
degree in S K Somaiya College of Somaiya Vidyavihar University.

[Name of Guide]

[Name of Program Coordinator]

Prof. (Dr.) Neetin Desai
Director

DECLARATION

I declare that this written report submission represents the work done based on my and / or others' ideas with adequately cited and referenced the original source. I also declare that I have adhered to all principles of academic honesty and integrity as I have not misinterpreted or fabricated or falsified any idea/data/fact/source/original work/ matter in my submission.

I understand that any violation of the above will be cause for disciplinary action by the college and may evoke the penal action from the sources which have not been properly cited or from whom proper permission is not sought.

Executive Summary

This whitebook presents the design and implementation of a machine learning–based Football Player Injury Risk Prediction System. The project aims to help coaches and medical teams(especially the ones in India) proactively identify injury risks based on player performance metrics and historical data. Using a dataset of professional football players, we conducted data preprocessing, exploratory data analysis (EDA), and model training using classification algorithms. A user-friendly Flask web app was developed to allow input and display real-time predictions. Our results demonstrate the potential of data-driven approaches in sports analytics, with promising accuracy and practical application in player management and injury prevention strategies.
